

Stainless steel maintenance spray

Functionality

Maintenance, protection and cleaning of shining and matt stainless steel. Ideal for pool ladders, stainless steel surge showers, outdoor showers or pool edges of stainless steel pools. Care, protection and cleaning of metal surfaces

- Protects and preserves all metal surfaces.
- Produces a streak-free, radiant shine
- The treated surface is protected against rapid re-soiling and stained appearance
- Removes and prevents fingerprints
- Drains water off
- Rebuilds the necessary protective layer
- Particularly economical
- Provides shining brilliancy

Application

Shake can well before use. Hold the spray head in the direction of the arrow, vertically at a distance of approx. 25 - 30 cm from the component and spray a thin, even layer onto the component. Wipe well with a dry, soft cloth until all stains, streaks, etc. are removed.

For the initial care of stainless steel and other materials, remove the coarse dirt from the surfaces to be cleaned before.

Durability and storage:

At least 24 months in the original sealed container. Storage temperature between 10°C and 40°C Store the product in a dry place (relative humidity of max. 60%).

The information contained on the technical datasheet is provided in all good faith and results from measurements made in our laboratory. Given the number of materials, differences in quality and diversity of working methods, we recommend that users perform tests prior to application under actual conditions of use. This document may be amended in keeping with product development and the state of our knowledge without prior notice and therefore it is recommended to check that you have the latest version before use. The safety data sheet is available online at www.fermit.com
