· Additional information For the wording of the listed hazard phrases refer to section 16.

SECTION 4: First aid measures

- · 4.1 Description of first aid measures
 - *After inhalation* Supply fresh air.

In case of persistent symptoms consult doctor.

· After skin contact

Wash with water and soap.

- In cases of freeze burns, rinse with plenty of water. Do not remove clothing.
- · After eye contact
- Rinse opened eye for several minutes under running water.
- In case of permanent aches and pains please go and see the doctor.
- After swallowing Swallowing is not considered to be a possible way of exposure.
- 4.2 Most important symptoms and effects, both acute and delayed drowsiness Dazed
- **4.3** Indication of any immediate medical attention and special treatment needed No further relevant information available.

SECTION 5: Firefighting measures

- · 5.1 Extinguishing media
 - · Suitable extinguishing agents
 - CO2, extinguishing powder or water jet. Fight larger fire with alcohol-resistant foam.
 - · For safety reasons unsuitable extinguishing agents Water with a full water jet.
- 5.2 Special hazards arising from the substance or mixture

During incomplete combustion carbon monoxide can be formed.

Pressure build-up and risk of bursting when heated.

Vapours are heavier than air and may travel long distances along ground, ignite and flash back to source.

(Contd. on page 4)

Version number 1

Revision: 24.10.2023

Trade name: Markierspray blau

- (Contd. from page 3) • 5.3 Advice for firefighters • Protective equipment: Do not inhale explosion gases or combustion gases. In case of fire wear breathing equipment being independent of ambient air and suit provided full
 - protection against chemicals. Additional information Cool endangered containers with water spray.
 - Remove goods in stock from incendiary zone, if possible.

SECTION 6: Accidental release measures

- 6.1 Personal precautions, protective equipment and emergency procedures Ensure adequate ventilation Keep away from sources of ignition - No smoking. Avoid contact to eyes, skin and clothes.
- **6.2 Environmental precautions:** Damp down gases/fumes/haze with water spray jet. Do not allow to enter drainage system, surface or ground water.
- 6.3 Methods and material for containment and cleaning up: Ensure adequate ventilation.
- · 6.4 Reference to other sections

See Section 7 for information on safe handling

See Section 8 for information on personal protection equipment.

See Section 13 for information on disposal.

SECTION 7: Handling and storage

- **7.1 Precautions for safe handling** Ensure good ventilation/exhaustion at the workplace. Keep away from heat and direct sunlight. Keep empty containers away from heat and ignition sources. Do not spray into the eyes.
 - Information about protection against explosions and fires: Keep ignition sources away - Do not smoke.
 Beware: Container is pressurized. Keep away from direct sun exposure and temperatures over 50°C. Do not open by force or throw into fire even after use.
 Do not spray on flames or red-hot objects.
- · 7.2 Conditions for safe storage, including any incompatibilities
 - · Storage
 - Requirements to be met by storerooms and containers:
 - Observe official regulations on storing packagings with pressurised containers.
 - Information about storage in one common storage facility: Keep away from food, drink and animal feeding stuffs.
 - Do not store together with oxidizing or self-igniting substances.
 - *Further information about storage conditions:* Store in cool, dry conditions in well sealed containers. Protect from heat and direct sunlight.
- 7.3 Specific end use(s) No further relevant information available.

SECTION 8: Exposure controls/personal protection

· 8.1 Control parameters

- Components with limit values that require monitoring at the workplace: WEL: workplace exposure limit
- OEL: Occupational Exposure Limit

(Contd. on page 5)

(Contd. from page 6)

Trade name: Markierspray blau

· Hand protection

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.

Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture.

Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

Material of gloves

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

· Penetration time of glove material

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

· Eye/face protection

Tightly sealed safety glasses.

· Body protection:

Wear antistatic clothing made from natural fibres (cotton) or heat-resistant synthetic fibres.

SECTION 9: Physical and chemical properties

General Information		
· Physical state	Aerosol	
· Colour:	According to product specification	
· Odour:	Characteristic	
 Melting point/freezing point: 	Not determined	
· Boiling point or initial boiling point and		
boiling range	Not applicable, as aerosol	
 Lower and upper explosion limit 		
· Lower:	1.5 Vol % (1330-20-7 xylene, mixed isomers, pure)	
· Upper:	13 Vol % (67-64-1 acetone)	
· Flash point:	Not applicable, as aerosol	
 Auto-ignition temperature: 	Product is not selfigniting.	
SADT		
· pH	Not determined.	
· Viscosity:		
 Kinematic viscosity 	Not determined.	
· dynamic:	Not determined.	
· Solubility		
· Water:	Not miscible or difficult to mix	
 Vapour pressure at 20 °C: 	240 hPa	
Density and/or relative density		
· Density at 20 °C	0.938 - 1.08 g/cm ³	
0.2 Other information		
Appearance:		
· Form:	Aerosol	
Important information on protection of		
health and environment, and on safety.		
• Explosive properties:	Not determined.

· Seveso category P3a FLAMMABLE AEROSOLS

· Qualifying quantity (tonnes) for the application of lower-tier requirements 150 t

• Qualifying quantity (tonnes) for the application of upper-tier requirements 500 t

• REGULATION (EC) No 1907/2006 ANNEX XVII Conditions of restriction: 3

• DIRECTIVE 2011/65/EU on the restriction of the use of certain hazardous substances in electrical and electronic equipment – Annex II

None of the ingredients is listed.

· REGULATION (EU) 2019/1148

• Annex I - RESTRICTED EXPLOSIVES PRECURSORS (Upper limit value for the purpose of licensing under Article 5(3))

None of the ingredients is listed.

· Annex II - REPORTABLE EXPLOSIVES PRECURSORS

67-64-1 acetone

· Regulation (EC) No 273/2004 on drug precursors

67-64-1 acetone

• Regulation (EC) No 111/2005 laying down rules for the monitoring of trade between the Community and third countries in drug precursors

67-64-1 acetone

National regulations

• Water hazard class: Water hazard class 2 (Self-assessment): hazardous for water.

· Substances of very high concern (SVHC) according to REACH, Article 57

None of the ingredients is contained.

· 15.2 Chemical safety assessment: A Chemical Safety Assessment has not been carried out.

SECTION 16: Other information

These data are based on our present knowledge. However, they shall not constitute a guarantee for any specific product features and shall not establish a legally valid contractual relationship. This safety data sheet meets the requirements of Regulation (EU) 2015/830 and 2020/878 amending Annex II of Regulation (EC) 1907/2006.

· Relevant phrases

H220 Extremely flammable gas.

H225 Highly flammable liquid and vapour.

- H226 Flammable liquid and vapour.
- H280 Contains gas under pressure; may explode if heated.
- H304 May be fatal if swallowed and enters airways.
- H312 Harmful in contact with skin.
- H315 Causes skin irritation.
- H319 Causes serious eye irritation.
- H332 Harmful if inhaled.
- H335 May cause respiratory irritation.
