• Additional information For the wording of the listed hazard phrases refer to section 16.

SECTION 4: First aid measures

· 4.1 Description of first aid measures

· After inhalation Take affected persons into the open air and position comfortably

· After skin contact

Wash with water and soap.

- In cases of freeze burns, rinse with plenty of water. Do not remove clothing. • After eve contact
- Rinse opened eye for several minutes under running water.
- In case of permanent aches and pains please go and see the doctor.
- After swallowing Swallowing is not considered to be a possible way of exposure.
- 4.2 Most important symptoms and effects, both acute and delayed drowsiness

Dazed

• **4.3** Indication of any immediate medical attention and special treatment needed No further relevant information available.

SECTION 5: Firefighting measures

- · 5.1 Extinguishing media
 - Suitable extinguishing agents
 - CO2, extinguishing powder or water jet. Fight larger fire with alcohol-resistant foam.
- For safety reasons unsuitable extinguishing agents Water with a full water jet.

· 5.2 Special hazards arising from the substance or mixture

Pressure build-up and risk of bursting when heated.

During incomplete combustion carbon monoxide can be formed.

Vapours are heavier than air and may travel long distances along ground, ignite and flash back to source.

- · 5.3 Advice for firefighters
- Protective equipment: Do not inhale explosion gases or combustion gases.

In case of fire wear breathing equipment being independent of ambient air and suit provided full protection against chemicals.

• Additional information Cool endangered containers with water spray. Remove goods in stock from incendiary zone, if possible.

SECTION 6: Accidental release measures

• 6.1 Personal precautions, protective equipment and emergency procedures Ensure adequate ventilation

Keep away from sources of ignition - No smoking.

Do not inhale vapours.

- 6.2 Environmental precautions: Damp down gases/fumes/haze with water spray jet.
- 6.3 Methods and material for containment and cleaning up: Ensure adequate ventilation.
- 6.4 Reference to other sections See Section 7 for information on safe handling See Section 8 for information on personal protection equipment. See Section 13 for information on disposal.

SECTION 7: Handling and storage

• 7.1 Precautions for safe handling
 Ensure good ventilation/exhaustion at the workplace.
 Keep away from heat and direct sunlight.
 Keep empty containers away from heat and ignition sources.
 • Information about protection against explosions and fires:
 Keep ignition sources away - Do not smoke.
 Beware: Container is pressurized. Keep away from direct sun exposure and temperatures over 50°C. Do not open by force or throw into fire even after use.
 Do not spray on flames or red-hot objects.

- 7.2 Conditions for safe storage, including any incompatibilities • Storage
 - · Requirements to be met by storerooms and containers:
 - Observe official regulations on storing packagings with pressurised containers.
 - · Information about storage in one common storage facility: Not required.
 - *Further information about storage conditions:* Store in cool, dry conditions in well sealed containers. Protect from heat and direct sunlight.
- · 7.3 Specific end use(s) No further relevant information available.

SECTION 8: Exposure controls/personal protection

· 8.1 Control parameters

- Components with limit values that require monitoring at the workplace:
- WEL: workplace exposure limit
- OEL: Occupational Exposure Limit

· 8.2 Exposure controls

• Individual protection measures, such as personal protective equipment • General protective and hygienic measures

Do not eat, drink or smoke while working.

Wash hands during breaks and at the end of the work.

Do not inhale gases / fumes / aerosols.

- Breathing equipment:
- Not necessary if room is well-ventilated.

Use breathing protection in case of insufficient ventilation.

Filter AX. • Hand protection

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.

Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture.

Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

· Material of gloves

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.
